

**Camrose Ski Club  
Vice-President Report  
Morten Asfeldt**

**Annual General Meeting  
Thursday, June 6, 2024**

The role of Vice-President is to support the President and take on projects as needed. Here is a summary of key projects of the past year.

**Biathlon Outhouse:**

We applied for two grants to support this project. Our application to the UFA Rural Communities Foundations was unsuccessful. We expect to hear the outcome of our application to the Community Facility Enhancement Program in July 2024.

This is a joint project with the Camrose Shooting Association who have committed to shared funding with the Camrose Ski Club.

**City of Camrose, Trail Master Plan:**

The trail master plan was jointly funded by the Camrose Ski Club and a grant that the City of Camrose secured from the Provincial Government. The trail master plan is now complete and has been presented to City Council. The master plan provides a comprehensive conceptual plan for future xc-ski, walking, mountain biking, and multi-use trail development in the Stoney Creek Valley.

Our task now is threefold:

1. To ensure that we use this plan to guide future trail development.
2. Continue to work collaboratively with the City of Camrose to implement and fund the master plan.
3. Seek funding through our annual budget, grants, and corporate fund-raising to implement the master plan.
