

Camrose Ski Club
Vice-President Report
Michelle Eriksson
Annual General Meeting
Thursday, June 9, 202

The role of Vice-President is to support the President and assist with club events and initiatives as needed. Overall, it was a great year, with excellent snow and weather conditions that allowed us to run many of our programs and events successfully. A big thank you to all our board members for their contributions throughout the year, and an equally big thank you to the coaches and volunteers whose time and effort make these programs and events possible.

Events

We were fortunate this year to have the right temperatures and snow conditions to host both the Ole Uffda Loppet and the Calforex Cup. After three years of planning for the Calforex Cup, it was very exciting to finally have the conditions needed to move ahead with the event. I learned a great deal about biathlon throughout the process and found the ski and biathlon community to be an enthusiastic, supportive, and enjoyable group to work with.

Thank you as well to the running committee for organizing the Learn to Run program again this year, along with the Ole Spring Run Off event. It was a beautiful day with a great turnout, strong participation, and a fantastic atmosphere.

Adult Ski Programming

Thank you to Morgan Elaschuk for coaching the Learn to Ski program this year and helping introduce cross-country skiing to a great group of adult participants. This year we had 4 Learn to Loppet registrants and 3 registrants in the Beginner Learn to Ski course that Emily ran more informally later in the winter for three weeks.

Casino Fundraiser

A sincere thank you to all the volunteers who supported the Casino Fundraiser. This remains one of our largest fundraising initiatives, and we greatly appreciate everyone who took the time to sign up and help make it a success.

AED Donation

A special thank you to Leigh and Rob Heie and the Live Like Ole Foundation for their very generous donation of an AED to the club. We truly appreciate the time and care they took to research and provide a unit that is suitable for both adults and children. Their generosity and support are greatly appreciated.
